REGISTRATION OF THAI AND INTERNATIONAL PATIENTS FOR SEARCHING UNRELATED HAEMATOPOIETIC STEM CELL DONORS IN TSCDR

TSCDR accepts search request from Thailand and other countries. International registry from countries which are European Marrow Donor Information System (EMDIS) member can request search via EMDIS node (Hub). Registries from countries using MatchPoint System can register patients and search for Thai donors via MatchPoint.

Individual transplant center which is not a member of national registry needs to comply with TSCDR minimum requirements for stem cell transplant center/hospital in order to search for Thai donor (document No.KCH.P.1/B.E.2567).

Repeat search will not be performed automatically. Transplant Center or Registry must submit the request via EMDIS hub, MatchPoint or email.

TSCDR accepts donor search requests from other countries using either TSCDR form (SCWI002/001) or their own registry forms. TSCDR is the sole intermediary between other registries and transplant centers in Thailand and we do not allow transplant center directly contact with collection center.

The transplant center, after having performed a hematopoietic stem cell transplant using the TSCDR donor, must agree to update the patient's health in patient progress form for 10 years (SCWI002.11/001) and send the completed form to TSCDR.
